In claim 18: line 5, after "pins", -- . --(period) should be inserted.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 15 and 21 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 15, a question is raised as to whether "an axially compressible **metallic** locking ring" recited is the axially compressible locking ring of claim 1. Please see claim 26 for comparison.

For claim 21, a similar question is also surfaced with respect to "an axially compressible grommet" vis-à-vis the axially compressible locking ring of claim 1. Are they the same thing? If they are, the recitation in claim 21 should be amended to reflect that.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-11, 15, 16, 21 and 22 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-10 and 15 of U.S. Patent No. 6,785,053. Although the conflicting claims are not identical, they are not patentably distinct from each other because the word "**grommet**" recited in claim 1 of the patent in consideration, as defined in The American Heritage Dictionary (Second College Edition), is the same thing as "**metal or plastic ring**", and the **grommet** performs a locking friction mechanism at thread interengagement locations when the holder is tightened on the lens body. Therefore, the axially compressible grommet of claim 1 of the patent is the axially compressible locking ring of claims 1 and 22 of the present case. For the metal nature of the grommet, the recitation in claims 11, 15 and 22 of the present case characterizes that.

In view of the above indication, it is noted that the scopes of the two inventions are the same.

Allowable Subject Matter

Claims 12-14, 17-20 and 23-26 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
